**DETAILED ACTION**

***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 18-21, drawn to a method for lowering premium rates to an insured, classified in class 705, subclass 4.
  - II. Claim 22, drawn to a method of providing insurance based on health factors associated with and insured classified in class 705, subclass 4.
  - III. Claims 23-28, drawn to a method of funding an insurance policy classified in class 705, subclass 4.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility as a establishing insurance premia and invention II has separate utility such as a method of evaluating health insurance risks. Invention III has separate utility such as a method of providing optimal insurance coverage. See MPEP § 806.05(d).

Art Unit: 3694

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and/or because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
